

**SEMINAR
UNDERGRADUATE STUDY PROGRAM OF VETERINARY
MEDICINE
SCHOOL OF VETERINARY MEDICINE AND BIOMEDICAL
SCIENCES
IPB UNIVERSITY
2024**

NAME :
STUDENT NUMBER : B0XXXX
STUDY PROGRAM : VETERINARY MEDINE
TITLE : Title is written in short sentence, capitalized,
and less than 100 characters.

SUPERVISORS : Full name with academic title of 1st
supervisor
Full name with academic title of 2nd
supervisor

DAY/DATE :
TIME :
PLACE : Ruang Wing ... Lantai ..., Sekolah
Kedokteran Hewan dan Biomedis IPB

English Title (Times New Roman 14 pt, Bold, Maximum 14 words)
(Title in *Bahasa Indonesia* (Times New Roman 12 pt, maksimal 14 kata))

Student name¹, First supervisor^{2*}, Second supervisor³

¹Undergraduate Student in Veterinary Medicine, School of Veterinary Medicine and Biomedical Sciences, IPB University, Jl Agatis Kampus IPB Dramaga, Bogor, Jawa Barat, Indonesia

²Division, Faculty/School, Institution, Address, Postal Code, City/Regency, Province, Country

³Division, Faculty/School, Institution, Address, Postal Code, City/Regency, Province, Country

ABSTRACT

Use the word "ABSTRACT" in the title in Times New Roman capital letters, size 10pt, bold, relative to the left of the column. The abstract is written in italicized text, below the abstract in Bahasa with one column as here. Abstracts are written in Times New Roman, size 10pt, single spaced, and a maximum length of 200 words. Include three to six keywords related to the article.

Keywords: keyword 1, keyword 2, keyword 3, keyword 4, keyword 5, keyword 6

ABSTRAK

Kata "ABSTRAK" sebagai judul ditulis dalam huruf kapital Times New Roman 10pt, cetak tebal, rata kiri. Isi abstrak harus merangkum ringkasan yang berisi latar belakang, tujuan penelitian, metode, hasil temuan dan kesimpulan utama dari tulisan. Penulis yang memilih menggunakan Bahasa Indonesia, maka perlu ditambahkan abstrak kedua dalam Bahasa Inggris seperti contoh di bawah ini. Abstrak ditulis dengan rata kiri-kanan, dengan satu spasi dan satu kolom menggunakan huruf Times New Roman 10pt maksimal 200 kata. Di bawah paragraf abstrak, tuliskan kata kunci dari manuskrip, minimal 3 kata/ frasa dan maksimal 6 kata/frasa yang dipisahkan dengan tanda baca koma antar kata/frasa.

Kata kunci: Kata kunci 1, kata kunci 2, kata kunci 3, kata kunci 4, kata kunci 5, kata kunci 6

1. Introduction

The following are instructions for writing articles in the Veterinary and Biomedical Journal published by the School of Veterinary Medicine and Biomedicine, IPB University. The authors are fully responsible for the contents of the manuscript written and the manuscript is an article that has never been published (Jvetbiomed, 2024)

Divide your article clearly into numbered sections. The title of the main section is given number 1. (then 2, 3, etc.) which consists of introduction, material and methods, results, discussion, conclusions using Times New Roman font size 11pt, bold. Leave one space between the main sections. Subsections should be numbered 1.1. (later 1.1.1, 1.1.2,...), 1.2, etc. (abstract, acknowledgments and reference list are not included in the section numbering). Each subsection can be given a short title. Each title must appear on its own separate line, written using Times New Roman size 11pt., and there should be no spaces between subsections (Jvetbiomed, 2024).

The contents of the introduction are answers to questions: (1). Background, (2). Brief literature review of related research (3). Reasons for conducting this research and (4). Goal question. Sophistication, gap analysis and novelty are visible here. Avoid discussing general literature reviews and definitions (Jvetbiomed, 2023; Jvetbiomed 2024)

2. Materials and methods

Provide sufficient detailed explanations so that readers can easily understand how research activities can be carried out. Published methods should be indicated by reference or any minor modifications should be explained. Please explain whether this research is experimental or exploratory. Determine the sample size and explain where you obtained the sample. State seasonal variation of habitat (if any) or date of sampling. If data is collected using humans or experimental animals, the author must include a certificate/standard ethical test number approved by an accountable institution.

3. Results

Results and Discussion must be written separately. Results must be clear and concise. State the results obtained based on the method carried out. Table or graph data can be accompanied by standard deviation. To further clarify the explanation, you can use subtitles.

3.1. Table

Tables should be numbered in the order of presentation (**Table 1**, etc.). Tables must be referenced and referenced in the text. There are no perpendicular lines in the table. When writing tables, use Times New Roman 10pt font which is placed above the table. Table names are in bold and table titles are not in bold and are aligned left. The main headings of the columns containing data are in bold, while the contents of the columns and rows are not in bold. An example table can be seen in **Table 1**.

Table 1. Example of a table title that is not in bold

Column 1	Column 2	Column 3
Data 1	Data 1	Data 1
Data 2	Data 2	Data 2
Data 3	Data 3	Data 3

3.2. Picture

The pictures are numbered according to the order of presentation (**Figure 1.**, etc.). The image title is placed below the image in a center-aligned position according to the image size. Image names are in bold and image titles are not in bold and are aligned left. The font size used in the image title is 10pt. Figures must be referenced and referenced in the manuscript. Make sure each illustration has a caption, provide the caption separately, not attached to the image. Captions should consist of a short title (not of the image itself) and a description of the illustration. Try to make the image free from anything else that distracts the reader to capture the main information from the image presented. Explain all symbols and abbreviations used. An example can be seen in **Figure 1**.

Figure 1. Example of an image on jvetbiomed

3.3. References

The reference list is made sequentially starting from 1, 2, 3, etc. The name of the journal or book referred to is written in full, not abbreviated. Everything listed in the

bibliography/references must be referenced/referred to in the manuscript. There are a minimum of 10 references in the last 10 years. The title "Reference List" is written in Times New Roman 10pt, left aligned and bold. The contents of the Reference List are written in Time New Roman 9pt font size, aligned right and left. Writing the Reference List in alphabetical order. An example of writing a reference list can be seen in the reference sub list.

3.4. Formula

Formulas are written clearly using equations with index numbers, explanations of formula variables are written in paragraph form, not list items.

3.5. Manuscript length

Manuscripts are written with a maximum of 10 pages including tables and figures, and a distance between paragraphs of 1.5 with reference to the writing procedures as outlined in this article.

3.6. Manuscript layout

An easy way to create a layout is to use this guide directly. Avoid using bullets/ordered lists with * and other symbols. Avoid blank parts of the page.

3.7. Page specifications

Use the Times New Roman typeface throughout the manuscript, with the font size as exemplified in this writing guide. The spacing is 1.5 and the contents of the text or manuscript use left-right alignment (justified). Page size is A4 (210 mm x 297 mm). The top page margin is 2 mm and the bottom, right and left page margins are 25 mm. Dividing a page into two columns is only for writing sentences, but for pictures or tables or can be separated into one column.

4. Discussion

The discussion must be discussed sharply with specific exploration regarding the results of the research conducted, not repeating parts of the results. Discuss your data by comparing currently reported data with previous data. Avoid extensive quotations and highlight similarities and differences in the results of your research.

5. Conclusion

The conclusion must contain the essence that answers the problem or aim of the research in the form of a short, clear and easy to understand description and not in the form of points. Conclude the conclusion with suggestions for future research in the particular topic.

Acknowledgment

State the name of the funder and facility provider who helped during research activities or manuscript writing, and include the grant/grant number if any. The title "Acknowledgments" is written using Times New Roman 10pt font and is in bold and left aligned. The contents of the thank you note are written aligned left-right, one space and one column using Times New Roman 10pt font, maximum 100 words.

References

The references contains all the literature referenced in the seminar paper manuscript. How to write can be seen in "Pedoman Penulisan Karya Ilmiah Tugas Akhir Mahasiswa Edisi ke-4: Bab VII Pengutipan Pustaka dan Penyusunan Daftar Pustaka".
